ArcticDEM Project has now mapped more than 65 percent of the Arctic

SPRINGFIELD, Va. — The National Geospatial-Intelligence Agency, in collaboration with the National Science Foundation's Polar Geospatial Center and Esri, has mapped more than 65 percent of the Arctic, detailed in the fifth Arctic DEM project release June 2.

This release is the largest yet, mapping 7.5 million square kilometers of the Arctic. With the previous four DEM releases, more than 24.6 million square kilometers of the Arctic has been mapped. With the previous four DEM releases, more than 24.6 million square kilometers of the Arctic has been mapped.

The project estimates total coverage of the Arctic landmass by December.

There have been 300,000 online downloads since the DEMs became publicly available in February.

The NGA Arctic DEM team will be at the GEOINT Symposium June 4-7 in San Antonio.
